1. Claims 13-22 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites forming the optical construct and then bonding a polarizer to the construct. However, claims 14-16, 20 and 31 call for processing steps that do not appear to further limit the method of claim 13. If the construct is already made before the polarizer is bonded thereto, as claim 13 appears to recite, then it is not clear how the limitations of claims 14-16, 20 and 31 can further limit the process of independent claim 13. The same is true of claim 17. Applicant is requested to clarify how these claims further limit claim 13 and/or clarify exactly what is encompassed in the wording of claim 13.

2. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's comments and declaration are probative with respect to the art rejection and the terminal disclaimer has obviated the double patenting rejection. However, upon closer review of the claims, it is believed that an indefiniteness problem exists with claim 13 and certain of its dependent claims. Namely, if the optical construct has already been formed and made—as recited in claim 13—before the polarizer is bonded thereto, it is not clear how the polymeric material making up the construct can be admitted into a mold cavity on one or both sides of the polarizer. I.e., it would appear that claim 13 is requiring the construct to be made before the polarizer is bonded thereto. An obviation of the 112 issues would place the application in condition for allowance.
